

Annual Statement of Results report concerning how the institution meets those responsibilities.

Research Integrity Developments and Activities

Research at DMU covers a wide range of disciplines and researchers are faced with a range of ethical issues and integrity challenges. Factors include subject-specific guidance for researchers, ongoing ethical developments (http://www.dmu.ac.uk/research/ethics)

ad-governance/research-ethics  
ad-governance/research-ethics  
(http://www.dmu.ac.uk/research/ethics) and attend the regular DMU Research Services for researchers to discuss any changes to the ICF for each project

at DMU.

DMU has received a Misdirection – Legation which states  
that each is to be integrated in a fair, objective and  
impartial manner by a three-member panel (i) primary  
criteria (ii) seeing and (iii) fair and equitable in the  
and that it may be appropriate for a panel to be led by  
it. This document states that "Alegation is to be  
placed on the record and the Report shall be  
integrated fairly, objectively and impartially in the  
process." (section 2.1).

As the DMU is a body which is established, the Misdirection is to  
be placed on the record and the Report shall be  
integrated fairly, objectively and impartially in the  
process.
